CANNAVATE

ABOUT THE COMPANY

Cannavate is a pioneer in the cannabis industry and a market leader in Israel since 2001. Cannavate runs HyDRoSHOP, a leading brand of 12 Highend Agri- equipment stores across Israel, where it successfully sells growing equipment accessories and technologies. With HyDRoSHOP, Cannavate has several brands at the territories such as fertilizers, agriculture light systems, cannabis paraphernalia, and more.

Our extensive experience in manufacturing, exporting and distributing cannabis products and paraphernalia, including wholly-owned global brand Puffiz, a gem among cannabis brands and marketing in Amazon worldwide. Through its Canna-Magazine Cannavate publishes content and articles about the cannabis plant and the industry and by publishing its bestseller book "The Israeli Guide to Growing Cannabis."

Cannavate is a medical cannabis R&D group, aiming to bring a new standard of research and innovation into the industry's ecosystem. From cultivation to developing and producing top-notch research farm and accelerator.

CANONIC

BRINGING PRECISION TO MEDICAL CANNABIS

ABOUT THE COMPANY

Canonic is a subsidiary of Evogene (NASDAQ, TASE: EVGN), developing medical cannabis products through a Computational Predictive Biology (CPB) platform. The company's products in development are aimed at improving active compounds yield, genetic stability and cannabis varieties for specific medical indications.

The company's strategy includes the development of cannabis varieties in order to commercialize medical cannabis products independently or through collaborations.

Canonic has exclusive access to Evogene's genomic assets and technology for the development of medical cannabis products.

GEMMACERT

BE CERTAIN. STOP GUESSING.

ABOUT THE COMPANY

GemmaCert takes the guesswork out of cannabis potency – now you know exactly what you’re growing, buying, or selling. GemmaCert combines 3 state-of-the-art technologies – spectrometry, image analysis, and machine learning – to bring you rapid, reliable, real-time results. No special skills or training are required. All you need are the patented GemmaCert device and our user-friendly secure app to benefit from reliable composition and potency readings in moments. Best of all, GemmaCert is completely non-destructive, meaning you can test any flower or product you want: all the certainty, none of the downsides.

Israel is a world leader in the medical cannabis arena. The combination between Israel's renowned agrotechnology sector and the thriving life science industry, powered by the spirit of the start up nation and accommodating climate, has placed Israel in a unique position. This is backed by more than 50 years of ongoing research and clinical trials, dating back to the 1960s when Prof. Mechoulam first isolated the THC and carried out groundbreaking work on the endocannabinoid system.

The Israeli medicalization process, based on the comprehensive clinical guide, also known as the "Green Book" is a first of its kind. The strictly controlled agricultural and manufacturing processes, together with the medical guideline, promise the patients high quality pharma- grade products suited to their needs. This has led to a tremendous growth in the number of patients and an establishment of a thriving industry.

We are proud to present the first official Israeli delegation in the cannabis sector, under the governmental collaboration of The Israel Export Institute, Ministry of Economy and Industry, Economic Mission to the West Coast, and Invest in Israel. The organizations work toward the common goal of promoting Israeli industry through supporting trade and exports, fostering strategic cooperation, and attracting foreign investments. The result is a unique and valuable platform to support innovation and global business connections. We look forward to seeing you at MJBizCon 2019.
